

On the material log page, the user can click the trash can button on the upper right side of each individual entry. Upon clicking it, a message will pop up asking the user if they're sure they want to delete the entry. If they select yes, the entry will be deleted from the individual's database and their material log page. If they select no, the pop up window will disappear and the page will remain the same as before they clicked the trash can icon.
